

GEORGIA VETERINARY SPECIALISTS RADIOLOGY SERVICES

Georgia Veterinary Specialists is pleased to welcome the newest member of our staff, Gustavo Sepulveda, MS, DVM, Dipl ACVR. Dr. Sepulveda is a board certified radiologist who comes to Georgia Veterinary Specialists to oversee our imaging services. Dr. Sepulveda received his DVM from the University of Tennessee in 2000 and went to Michigan State University for his small animal internship. He stayed at Michigan State to complete his residency in radiology and then became an Assistant Professor of Veterinary Radiology before moving to the Atlanta area. We are happy to have him join our team at GVS.

Dr. Sepulveda's presence at GVS will greatly enhance our current ability to perform in-depth diagnostic studies including routine survey radiographs, all contrast radiological procedures, abdominal, thoracic, and soft tissue ultrasound, CT imaging, and we will soon be offering MR imaging on-site.

We are offering radiographic interpretation services through Dr. Sepulveda. Any films you wish to be reviewed can be submitted for his interpretation. This can be done by mailing or dropping off radiographs at GVS. Please be sure to note ATTN: Dr. Sepulveda on the folder. Please mail radiographs to:

Georgia Veterinary Specialists
Radiology Dept. ATTN: Dr. Sepulveda
455 Abernathy Rd. NE
Atlanta, GA 30328

If you wish to have digital radiographs reviewed through Vetpacs, please be sure to include the patient code.

In addition, Dr. Sepulveda will be seeing outpatients for ultrasounds by appointment on weekdays. Clients will meet with Dr. Sepulveda and an ultrasound will be performed. Fine needle aspirates can be done as well, if needed. Dr. Sepulveda will discuss results with the clients and the patients will be discharged. If further procedures are felt to be necessary (biopsies, medicine/surgery/neurology consultations, CT scans, etc) this will be discussed with you to determine whether to transfer the patient to another GVS specialist or back to you.

Pricing for radiology services

- Formal written report – \$64 (can be mailed and/or faxed)
- Oral report only - \$44 (response within 24 hours)
- CT reports - \$79 (can be mailed and/or faxed)

Outpatient ultrasound (excluding aspirates) - \$300 (to be charged directly to client)

Enclosed is a radiograph submission form. Please include all pertinent patient information including age, species, breed, and history.

If you have any questions, please call GVS at 404-459-0903 and ask for Dr. Sepulveda, Debbie, or Beth.
