

## Neurology/ Neurosurgery Services

Neurology is a recent addition to Georgia Veterinary Specialists (GVS) and we are pleased to have the only board certified neurologist in the Atlanta area as a member of our team of Specialists. With the addition of Ronald P. Johnson, DVM, ACVIM (Neurology) to our staff, we are able to offer complete neurological (medical and surgical) care for our patients.

The diagnosis and treatment of a neurological condition begins with a complete examination of your pet's nervous system. The examination is fairly involved, but will aid in localizing the problem. Further diagnostics are often required to determine the exact location of the problem, to arrive at the correct diagnosis, to evaluate the extent of damage to the neurologic system, or to provide the most accurate prognosis possible. At GVS, we are able to perform the following diagnostic evaluations:

- Electrodiagnostic examinations (Electromyography, Nerve Conduction Studies)
- Brainstem auditory evoked response testing (BAERs) - hearing tests
- Computed tomography (CT)
- Myelography
- Evaluation of cerebrospinal fluid (CSF)

When indicated, our Neurologist is able to assist your pet with any neurosurgical needs that may be required. Our Intensive Care Team will carefully monitor the recovery of your pet and will remain in constant communication with the Neurosurgeon.

## Meet Our Neurologist

Dr. Johnson

**Ronald P. Johnson, DVM, ACVIM (Neurology)** joined GVS in 2002 to lead our new neurology department. Dr. Johnson received his undergraduate degree from the University of Central Florida and his DVM degree in 1996 from the University of Florida (UF). He then completed an internship at Louisiana State University (LSU). He returned to UF to complete a residency in medical neurology and neurosurgery.

Call us at 404-459-0903 to make a Neurology appointment with Dr. Johnson or for assistance with additional information regarding our Neurology services.
