Reuben Merideth, DVM  
*Diplomate American College of  
Veterinary Ophthalmology*

Jennifer Hyman, VMD,  
*Resident, AVCO*

Pets can experience many of the same eye diseases as people. Red, painful or weepy eyes may signal the presence of infections or even cancers.

Our veterinary ophthalmologists specialize in treating a wide variety of ocular problems, including; cataracts, glaucoma, dry eyes, retinal diseases, severe injuries, cancer of the eye and even cosmetic conditions. VSEC's medical and surgical ophthalmic care extends to multiple breeds and species including dogs, cats, equine, avian, wild and zoo animals. Our ophthalmologists use a variety of specialized therapies to treat and manage your pet's eye disease including state-of-the-art medications, advanced diagnostic and testing, microscopic, cataract, and laser surgery. You'll find everything you need at VSEC to ensure your pet maintains the best possible vision throughout his or her life. 🌸
