

# Surgery

---

Joseph Desch II, DVM MS  
*Diplomate American College  
of Veterinary Surgeons*

When your pet needs surgery you'll want a surgeon who has had advanced training in the most up-to-date surgical techniques combined with lots of experience. At VSEC, our dedicated surgeons perform thousands of the most complicated and specialized surgeries every year. Whether your pet has a broken leg, an intra-abdominal tumor, or a bone stuck in his or her intestines, our surgeons have the experience to fix the problem expediently, with minimal risk. If your pet needs an arthroscopy, a total hip replacement, or a skin graft, you can be certain your pet will receive the personalized and caring service that VSEC is known for.

Candace Layton, DVM MS  
*Diplomate American College of  
Veterinary Surgeons*

Our state-of-the-art surgical suites include the newest surgical equipment and patient monitoring capabilities to safeguard your pet's health during the surgical procedure. After surgery, your pet is monitored in our 24 hour intensive care unit (ICU) where we make certain he or she is successfully recovering from the anesthesia and the procedure. Our compassionate nursing staff will ensure that your pet is clean, comfortable, free of pain, and well on the road to recovery. 🌸

Steven Riley, DVM DVSc  
*Diplomate American College of  
Veterinary Surgeons*

***At VSEC, our attention to detail before, during, and after surgery ensures your pet the best chance for a favorable surgical outcome and recovery.***
